

Coming together to support HAITI

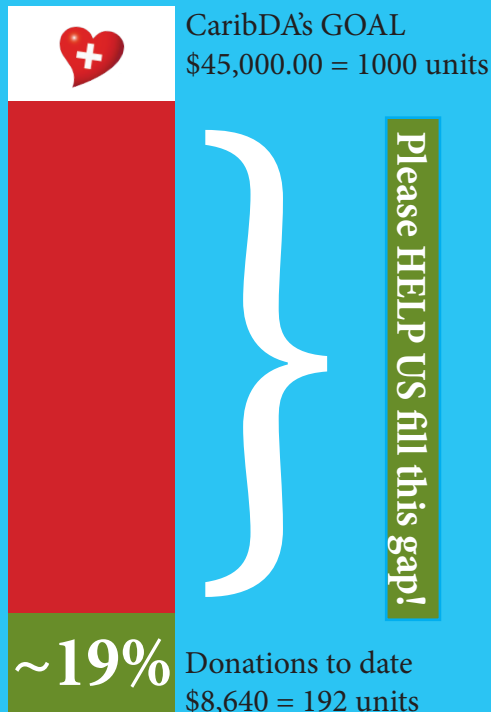

[CLICK HERE TO DONATE NOW.](#)

On October 4, 2016 Hurricane Matthew hit Haiti as a Category 4 Storm and caused massive loss of life, destruction of property and spoilage of water resources. One of the side effects of the water contamination is a cholera outbreak which can cause yet again, many deaths particularly in the southwest rural areas which have been badly hit.

In partnership with the Pan American Development Foundation, the **CaribDA Humanitarian Committee** has undertaken a commitment that fits our mission to assist in getting supplies to Haiti to help eliminate cholera from drinking water.

OUR GOAL IS TO SEND 1000 SAWYER POINTONE WATER TREATMENT UNITS TO HAITI BY JAN. 31, 2017.

**WE ARE MAKING PROGRESS, and we
THANK YOU FOR YOUR GENEROSITY!**

We need to do more!

"Eliminating cholera from Haiti, and living up to our moral responsibility to those who have been most directly affected, will require the full commitment of the international community and, crucially, the resources necessary." Permanent UN Secretary Gen Ban Ki-moon

Over the last 6 years cholera in Haiti has afflicted nearly 800,000 people and has claimed the lives of over 6,000. Hurricane Matthew has contributed to the devastation.

It has ONLY been nearly a month since Hurricane Matthew. We STILL need your help to make a difference!

Sawyer PointOne Units are proven in disaster relief for the treatment of cholera. These simple units work by gravity and are back-washable. Each unit treats ~287 US gallons per day. Sawyer has partnered in the cause, offering CaribDA members a discounted rate and warehousing to consolidate shipping.

PADF will manage CaribDA member donations that will be specifically earmarked for the purchase of Sawyer Units & 5 gallon buckets (manufactured in Haiti by PlasTech Industries in Haiti).

Rotary Haiti members demonstrating a Sawyer Unit.

100% of donations made on the PADF site go directly to the purchase and shipping of the kits. PADF will clear them into Haiti and distribute through their network working in Haiti at their own expense.
